Proposal Assumptions

The Alteryx license cost is a once-off annual cost which will be incurred upfront by Leroy Solutions LTD. This will enable Leroy Solutions to prepare CV's for individuals through the use of the software. The initial cost of the software is R89000. The cost has been split across the three different businesses.

We have projected the preparation of 50 CV's for the year of assessment of FY2025.

Advertising costs of \$161 have been included into the budget for the first month of the project, this is related to capturing the market. This is a cost which is expected to decrease over time as the business expects more of the market to be aware of the services provided by the company.

Wages and Salaries have been estimated at \$8333 per month. The basis of this salary amount is based on market- related salaries for a start-up company. The salary is at arms-length. This can be expected to change based on the number of CV's which Leroy Solutions LTD would be willing to prepare. The wages and salary has been divided by 3 to account for all three businesses..
